CWPP/Firewise Assessments - Three areas (1 in each geographic region) have been identified in the State to focus CWPP accomplishments in. These 33 counties were based primarily upon unemployment rate and those areas of the State where very little CWPP work has been accomplished. There are approximately 110 fire districts in each geographical area. Contractors will be used to collect fire district and county wildland fire pre-planning and/or pre-attack data in a GIS and North Carolina Division of Forest Resources (DFR) CWPP database format. Firewise assessments will be completed using the National Fire Protection Association's (NFPA) 1144 form and assessments will be summarized in GIS and DFR database format. An assistant CWPP manager will be hired internally to help manage this assessment program

Hazardous Fuels Mitigation - Contractors will be hired to accomplish fuel mitigation projects on a statewide level. The initial work will focus around those areas that already have a CWPP or a Firewise plan in place that indicate fuels mitigation recommendations as part of the plan. The program would expand as more assessments are completed. Three hazardous mitigation managers will be hired (1 for each geographic region) to prioritize projects, package fuel mitigation work, locate contractors and submit bid packages. The managers would also oversee the work for quality, environmental regulation compliance, data collection, report writing, etc.
